

Directions: Shake well before use.
Treat only the affected area.

Skunk Insurance (SI) works fastest when it is the only product used. Do not use with shampoos, detergents or other skunk odor removal products. If something else was used for odor removal prior to SI, mix 3 heaping tablespoons of baking soda with 1 pint of water and soak all treated areas down to the skin for 20 minutes. Rinse, towel dry and then follow the directions below.

Apply at full strength. Push the nozzle under the fur to the skin. Soak the fur and massage into the skin. For facial areas, pour into a bowl and apply with a sponge. Clean inside your pet's nose with a cotton swab or rolled up paper towel. The nose will usually require multiple applications because the pet breathes out the liquid before it can complete its work. Avoid contact with eyes. **DO NOT RINSE.** Towel dry, let dry naturally or use a hair dryer.

Airborne problems: Mix SI with 50% water and apply with a cold mist vaporizer.

Fabrics: Dilute with 5 parts water. Test for colorfastness first by misting area and waiting 72 hours for results. **Laundry machines:** Use SI and water. **Nothing Else!** Fill the machine with water, add 4 oz. of SI, mix, then add the items or put 4 oz. of SI in automatic bleach dispenser.

FOR EXTERNAL USE ONLY

Triple-Pet
FOR BETTER PET HYGIENE

Skunks are out at night - So buy some insurance now!

Skunk Insurancetm

Pet Odor Management

Immediately destroys skunk odor - Guaranteed!

Odor will not return - Even if pet gets wet!

Less than 15 minutes to a clean smelling pet

16 fl. oz./473 ml

Hypo-Allergenic • Non-Toxic
Odorless • Non-Masking
Non-Staining

Removes odor from fabrics and hard surfaces.
Easy to use.

Skunk Insurance really works! Its fast acting formula will completely eliminate skunk odor in less than 15 minutes of contact time. It may also be used to eliminate skunk odors from fabrics, hard surfaces and residual airborne skunk spray.

Skunk Insurance breaks up skunk oil on contact, destroying the odor causing compounds. Odor will not return when the pet gets wet. It is hypo-allergenic, odorless and non-toxic. Unlike enzyme based formulas which stop working after application, Skunk Insurance works progressively on a broad range of pH, from acidic to alkaline.

Skunk Insurance is safe to use directly on your pet. Add it to washing machines and to humidifier and vaporizer reservoirs. Skunk Insurance does not mask odor, it destroys and eliminates it permanently.
